

Sprint 3 Plan

Product: CircleHome

Scrum Master: Cameron Cox

Team: Camille Yabu, Antonio Wydler, Pravin Agrawal-Chung, Cameron Cox, Jacqueline Lopez-Carbajal

Sprint Completion Date: 5/20/2026

Revision Number: 1.0

Revision Date: 05/06/2026

Goal

Improve the usability, organization, accountability, and overall user experience of CircleHome by refining task management workflows, improving dashboard visibility, implementing notifications, and creating a more polished and consistent mobile interface.

Would like us to all simulate the app and see what we like + dislike

Key points to add:

(3.2) No Edit Task screen exists at all. You can create and delete, but not edit. No confirmation dialog before marking complete (it just fires immediately). Task update syncing improvements (tied to edit screen)

(3.3) Notifications (biggest gap), firebase_messaging is in pubspec.yaml but nothing is actually wired up. No FCM initialization, no permission requests, no token handling, no notification triggers. Settings screen just says "Coming soon"

(3.5) Leaderboard nav item exists in the wide-screen sidebar but just shows "coming soon". needs to be built.

- Make it on the nav bar and allow it so the points add up from the difficulty metric + there's a bar chart with the leader in the middle and denoted by the profile picture

Move profile and settings together → when click into settings see the account + can click an edit profile icon that brings it to the profile page that we have now

- Add create new/join household into settings instead of homepage
- Be able to kick people from household

Have it so the + add Task and + care note buttons are automatically beneath the button nav bar. Make Recent Activity show only the last 5 tasks completed.

Create weighted round robin

Create care diary → maybe be able to do it for different people, for example: For grandma Betty, or our dog Mochi or something like that

Task Listing by User Story

(3.1) — “As a household member, I want to organize and filter tasks so that I can better manage my responsibilities.”

- Improve task status system (completed, incomplete, overdue) (2 hrs)
- Add filter options for task organization (2 hrs)
- Improve “My Tasks” vs “All Tasks” functionality (1 hr)
- Visually distinguish overdue tasks (2 hrs)
- Handle empty filter states cleanly (1 hr)

Total for 3.1: 8 hours

(3.2) — “As a household member, I want to edit and complete tasks safely so that I can manage responsibilities without accidental actions.”

- Create Edit Task screen/UI (2 hrs)
- Allow updating due dates and assignments (2 hrs)
- Improve task update syncing across devices (2 hrs)
- Add task completion confirmation dialog (2 hrs)
- Ensure undo/snackbar system works correctly after completion (1 hr)
- Improve edit task UX/layout (1 hr)

Total for 3.2: 10 hours

(3.3) — “As a household member, I want to receive notifications so that I stay aware of upcoming or overdue responsibilities.”

- Implement basic Firebase Cloud Messaging support (3 hrs)
- Trigger notifications for assigned tasks (2 hrs)
- Trigger reminders for overdue/upcoming tasks (2 hrs)
- Handle notification permissions/setup (2 hrs)

Total for 3.3: 9 hours

(3.4) — “As a household member, I want a cleaner and more informative dashboard so that household information and responsibilities are easier to view.”

- Refactor dashboard layout to prioritize household activity and tasks (2 hrs)
- Move household creation/join flow to separate screen (2 hrs)
- Display household name and member list more clearly (1 hr)
- Improve recent activity formatting/timestamps (1 hr)
- Improve dashboard readability and spacing (2 hrs)

Total for 3.4: 8 hours

(3.5) — “As a household member, I want a consistent and easy-to-use interface so that navigating the app feels smooth and intuitive.”

- Implement consistent bottom navigation bar across main pages (2 hrs)
- Ensure navbar stays fixed at bottom of screen on all layouts (2 hrs)
- Standardize navigation items across pages (Home, All Tasks, Profile, Settings) (1 hr)
- Move secondary features like Leaderboard outside main navigation (1 hr)
- Add sign-out confirmation dialog (1 hr)
- Improve overall UI consistency and spacing (2 hrs)
- Adjust app colors toward softer/pastel theme (1 hr)
- Improve responsiveness across pages/devices (2 hrs)

Total for 3.5: 12 hours

Additional Improvements

- Continue refining recurring task behavior
 - Improve loading/error states
 - Improve task completion feedback
 - Improve overall mobile usability
 - Improve dashboard polish and responsiveness
-

BUG FIXES (to do before 5/27)

Fix inconsistent navbar visibility
Fix delayed task refresh issues
Fix task completion feedback/snackbar issues
Fix layout shifting on larger screen sizes

Team Roles

(Frontend Dev, Scrum Notes, Backend Dev, Tech Lead, Full-Stack Dev, QA)

Sprint Hour Totals by User Story

User Story	Hours
3.1 -- Task organization and filtering improvements	8
3.2 -- Edit task screen and safe completion	10
3.3 -- Firebase Cloud Messaging / notifications	9
3.4 -- Dashboard refactor and improvements	8
3.5 -- Navigation, UI consistency, and polish	12

Daily Burndown Tracker

Sprint Day	Date	Ideal Remaining (hrs)	Actual Remaining (hrs)
Day 0	05/12 (Mon)	47.0	
Day 1	05/13 (Tue)	42.3	
Day 2	05/14 (Wed)	37.6	
Day 3	05/15 (Thu)	32.9	
Day 4	05/16 (Fri)	28.2	
Day 5	05/19 (Mon)	23.5	
Day 6	05/20 (Tue)	18.8	
Day 7	05/21 (Wed)	14.1	
Day 8	05/22 (Thu)	9.4	
Day 9	05/23 (Fri)	4.7	
Day 10	05/27 (Mon)	0.0	

The ideal remaining column decrements by 4.7 hrs/day (47 hrs over 10 working days). The sprint runs 05/12 through 05/27, skipping weekends. At the midpoint standup around 05/19, the Scrum Master should confirm 3.2 (edit task) and 3.3 (FCM notifications) are in progress since those are the heaviest lifts and 3.3 has zero existing wiring to build on.
